REFLEXOLOGY is a **science** that deals with the principle that there are reflex areas in the feet, hands, ears, face, and eyes, which correspond with all glands, organs and parts of the body. **REFLEXOLOGY** is a unique method of using the thumb and fingers on these reflex areas.

REFLEXOLOGY includes, *but is not limited to:*

- (1) *relieve stress and tension;*
- (2) *improves blood supply and promote the unblocking of nerve impulses;*
- (3) *assist nature achieve homeostasis that may relieve pain and restore body function.*
